

The Natural City – Part 2 of 2

General introduction

162 The Natural City International Symposion, Toronto, 23-25 June, 2004: Summary of Daily Program

Part 2: International issues of relevance to Canada

- 167 The editor's page** *P. Psomopoulos*
An initiative towards dismantling the broad concept of ekistics of balanced relations between nature and the other four elements of human settlements, i.e. Anthropos, Society, Shells and Networks.
- 168 Envisioning the natural city: The guest-editor's foreword** *Ingrid Leman Stefanovic*
The contents of this volume "is only the beginning of a conversation that, we hope, will continue as we jointly seek to better understand the full breadth and depth of how to transform our human settlements into spaces that respect the moral laws of nature in all their complexity."
- 170 Mitigating natural disasters: The role of eco-ethics** *David Etkin and Ingrid Leman Stefanovic*
The need for "a process that results in a greater emphasis on our interactions with and reliance upon the natural world, and the development of community resilience."
- 181 Resettlement of development-induced displacees: Emerging issues** *C. Emdad Haque*
A critical review of global experience leads to the need for establishing a participatory decision-making process and, through evaluation of alternative choices concerning major development, largely aims at mitigating to the maximum the usual negative impacts on displacees.
- 187 The city at the end of the cheap-oil era** *Klaus Illum*
The need for "adapting the economy to a decline in oil consumption ... [through] the dismantling of the oil-technological complex so as to ensure that oil demand peaks before oil production capacity peaks."
- 192 The role of the university in city planning: Cleveland's Lakefront Redevelopment Plan** *Wendy Kellogg and Kathryn Wertheim Hexter*
Challenges faced and lessons learned from a first two-year program initiated by an urban university aiming at bringing together public and private stakeholders in decision making.
- 203 Through the (not so) Green Door: University campus greening and curriculum change** *James Gray-Donald and David Selby*
"The campus does not have to look green to be sustainable or to promote commitment to sustainable lifestyles among staff and graduates." The importance of "working with holistic understandings of sustainability; ... employing a participatory pedagogy; utilizing campus assets to interpret ... [its] environment through sustainability lenses; and giving immediate feedback to the campus community on its sustainability performance."
- 213 The "Greening the Ivory Towers" Project: The University of Auckland case study** *T.W. Fookes, Alison Hall and Logan Whitelaw*
Results of Planning students' research based on a "Campus Sustainability Assessment Framework initiated by the Sierra Youth Coalition to "actively promote the inclusion of faculty, staff and students."

- 223 Non-motorized mobility in cities of the future: College and university campuses as a pilot project** *Spenser Havlick*
 “The time is at hand to determine whether [university and college] campuses, which are unique microcosms of our larger towns and cities, can demonstrate that neighborhoods, towns and cities of the future can become less dependent on the single occupant vehicle.”
- 228 Tethered vehicle systems for sustainable cities** *Richard Gilbert*
 Arguing in favor of future land transportation systems to “be dominated by ... vehicles that receive their motive energy via a rail, wire or magnetic effect.”
- 233 “Localization”: A means to reduce negative transportation impacts in the “natural city”** *Natalie Helferty*
 “With the decline in global fossil fuel reserves and the ever-increasing ... climate change, ... air pollution and degradation of nature, localization will not only be desirable, but absolutely necessary.”
- 236 Sustainable housing design and the natural environment** *Meltem Yilmaz and Ruşen Keleş*
 “... housing design must be based on the participation of users and principles of [sustainable development – reduce, recycle, reuse and recover – combining] new technology and inherited architectural vernacular.”
- 245 Planning the emergent Basque megalopolis as a natural multi-metropolitan complex** *Lawrence D. Mann*
 The evolution of the meaning attributed to the notion of “natural city” by planners and landscape architects from 1896 to the present, “leading to the idea of an urban natural-artificial trade-off matrix”: The case of the Basque urban system.
- 255 Metropolitan regions: New challenges for an urbanizing China** *Edward Leman*
 “Focused, policy-oriented, and comparative research on metropolitan regions could help to inform China’s policymakers on actions that could lead to... optimal outcomes” of governance and management.
- 282 Conditions for effective management of a river basin in the European Union** *Barbara Zanou*
 Methods, data and cooperation among all stakeholders in the process of planning and implementing water management according to the EU Water Framework Directive “in order to promote social, economic and environmental benefits from water uses and services on a sustainable horizon.”
- 289 Global urbanization, is it sustainable? The challenge to the UN World Urban Forum in Vancouver, 2006** *H. Peter Oberlander*
 “... the time has come to reverse the inevitable and enlist global societies and their human and economic resources to maintain the city’s historic civilizing impact.”
- 295 Ekistic grid index**
- 298 The anthropocosmos model**
- 301 The Program of WSE Meetings in Toronto, 22-26 June, 2004**
- 306 Cumulative Index of Contents of EKISTICS, January-December 2004 (Vol. 71)**

Cover: Early human occupation sites along the upper reaches of the Danube River and its tributaries in southern Germany (Source: Larson et al., “The Urban Cliff Hypothesis and its relevance to ekistics,” p. 79).

The papers in this triple issue – the second of two triple issues of vol. 71 on the general subject “The natural city” – were solicited and edited by Ingrid Leman Stefanovic, guest-editor for this volume. The University of Toronto’s undergraduate student, Eugene Berezovsky, and recent graduates Amanda Hickling and Hiromi Inokuchi, provided editorial and administrative assistance to Professor Stefanovic. P. Psomopoulos undertook the compiling and final editing of the whole in consultation with the guest-editor and some of the authors. R.J. Rooke provided editorial assistance, Alex Freme-Sklirou proofread the texts, Niki Choleva was responsible for typesetting and graphics, and Despina Moutsatsou for the final dummy from a maquette by the editor.
